

Philosophy

Hyeheon (Anna) Sin

I believe each child is the seed of our healthy and bright future. In order to grow the seed successfully, we have to provide a good environment, such as, fertile soil, fresh air, enough water, and bright sunshine. It is same for children. All children need a good environment that they can be nurtured in and educated with good sources provided by educators (Steiner). Once the seeds that we sow starts to grow in the good environment, it will produce abundant fruits (Bronfenbrenner). Children also will enjoy the abundant happiness with their harvest produced by a good environment. Based on my experiences with children, I found that children love to play in different settings including nature and various equipment and resource. Therefore, I would like to provide an age appropriate environment and learning resources to enhance their learning, interests, and talents (Erikson and Piaget).

To create a good setting in early childhood education and learning, I would welcome all children and families with a warm heart (Bowlby) and support their individual needs, interests, talents, and abilities to provide a wonderful experience (EYLF1).

I believe children have the right to be treated with respect, regardless of ethnicity, religion,

language, culture, lifestyle, background, and ability (Code of Ethics). As I value the diversity of children and families' uniqueness, I would bring their diverse experiences, perspectives, expectations, knowledge and skills to their learning

(EYLF 1, 2, 4).

Lastly, I believe positive words have the power to bring bright energy to everyone (Bowlby). I would like to be a role model to children at all times to spread positive energy (EYLF 2). It allows children to develop a positive attitude to learning, to recognize and respect the feelings of others, and to interact positively with them (EYLF Principle 1. Secure, respectful and reciprocal relationships / EYLF 5)
